

DDA 86-0431
5 March 1986

MEMORANDUM FOR: Director of Security

FROM: Richard J. Kerr
Deputy Director for Administration

SUBJECT: Additional Funds for Technical Security and the
Inman Report

DDA 86-0431
FILE 30-6

Jim:

1. The Executive Director is interested in exploring with Congress the possibility of getting supplemental funding in the FY-86/87 time frame. The approach would be to demonstrate that our requirements outpace our current funding level in the area of technical security and the implementation of the Inman Report.

2. Could you take the lead in preparing an outline of a program that could be provided Congress showing current levels of funding shortfalls and areas where additional funding would be valuable. I would do this in a very brief and graphic-oriented approach. You might consider using the same general format as Logistics used in presenting their space program. We need to have something in hand (even if it is in outline form) within the next couple of weeks. I would like to see it before we send it to Jim, or perhaps even in its development. We also should make sure that Danny Childs has an opportunity to review what we are doing.

3. I know Wayne probably is sick of trying to outline the technical security program, but this effort at least has the virtue of giving us an opportunity to show shortfalls and, at a minimum, will encourage Congress to support our FY-87 program as it was submitted.
